Recording of a lecture as part of the seminar Philosophical Problems of Physics (NPOZ007) in the winter semester of 2024.

Excluding:

= Each body has its own time **4:08 – 4:14h** . When they move the same way, the time is the same and when they move differently, the time is different, **an amazing discovery** says Krtouš. **If** it were possible to turn back time, what **would** consequences would that have. That is the **goal** of today's lecture, **a goal worthy of a professor**, says Krtouš (...**I wish I could earn extra money with crap in the field of "sci-fi"**) ... **to explore** this area and explore **as if / if...** , says Krtouš.

There's nothing to do at the Faculty of Mathematics and Physics. Sultan and Tyrl were lazily licking each other's balls, and grandma kicked Barunka in the *ass* until she broke 3 fence posts.
